PROJECT CAPABILITY STATEMENT

Bespoke natural stone for residential, hospitality and development projects.

MARBLE • ONYX • QUARTZITE • BESPOKE PROJECT SIZING

Custom manufacture • Project quantities • Worldwide delivery coordination
www.exechomesco.uk

DESIGN SUPPORT

In-house support for bespoke forms, dimensions and project requirements.

CUSTOM PRODUCTION

Natural-stone pieces made to agreed specification and finish.

GLOBAL PROJECT SUPPLY

One-off pieces and coordinated quantities with delivery planning.

A practical partner for natural-stone projects.

ExecHomes&Co supports one-off luxury residences, hospitality schemes and multi-unit developments with bespoke natural-stone products made around project requirements. We coordinate specification, custom sizing, stone selection and production support from enquiry through to dispatch.

PRODUCT SCOPE

- Freestanding natural-stone bathtubs
- Wall-mounted, countertop and pedestal basins
- Vanity tops and double-basin configurations
- Dining, coffee and side tables
- Shower trays, worktops and project-specific stone pieces
- Reception counters and architectural features by enquiry

PROJECT CAPABILITY

- Bespoke dimensions developed around drawings and specifications
- Stone, colour and finish selection around the intended design
- Single pieces or coordinated quantities for larger projects
- Manufacturing drawings and technical guidance before production
- In-house Design Manager support for custom forms and details
- Worldwide delivery coordination and project support

BESPOKE

Dimensions, stone and finish can be specified around the scheme.

PROJECT QUANTITIES

Support for one-off commissions and coordinated multi-unit requirements.

TECHNICAL SUPPORT

Specification, access and installation considerations reviewed before production.

Built for: Developers • Architects • Interior Designers • Hospitality • Private Residences

RESIDENTIAL

Luxury homes, private villas and bespoke one-off interiors.

HOSPITALITY

Hotels, spas, wellness spaces and destination properties.

DEVELOPMENT

Coordinated quantities for premium residential and mixed-use schemes.

Controlled from specification to dispatch.

Natural stone requires disciplined specification, experienced manufacture and consistent quality control. Our process is structured to establish the project brief before production, monitor fabrication through each stage and complete a rigorous release inspection before dispatch.

01 PROJECT & SPECIFICATION REVIEW

Drawings, dimensions, quantities, intended use, access requirements, stone choice and finish are reviewed before manufacture. Key technical details are clarified and agreed at the outset.

02 MATERIAL SELECTION & PRE-PRODUCTION APPROVAL

Material suitability, tone, veining and block or slab scale are assessed against the design. Where required, production drawings, dimensions and critical details are confirmed before fabrication begins.

03 PRECISION MANUFACTURE & IN-PROCESS CONTROL

Cutting, carving, hollowing, profiling, drilling and finishing are completed in controlled stages. Dimensions, alignment, recesses, tap or drainage positions and surface quality are checked throughout production.

04 FINAL QUALITY ASSURANCE & DISPATCH

Every finished piece undergoes rigorous multi-stage quality-control checks before release. Workmanship, dimensions, edges, surface finish, stone condition and overall specification are inspected before cleaning, protection, reinforced crating and specialist dispatch.

QUALITY CONTROL BEFORE RELEASE

DIMENSIONAL CHECKS	WORKMANSHIP	FINISH & STONE	PACKING & RELEASE
Key dimensions and configuration checked against the approved production brief.	Edges, carved details, joints and fabrication quality inspected for consistency.	Polish, texture, visible surfaces and natural-stone condition assessed before packing.	Final sign-off before protective wrapping, reinforced crating and dispatch coordination.

The aim is simple: each piece should leave production only after the agreed specification, finish and presentation have been checked and approved for release.

PRE-DISPATCH RELEASE STANDARD

Dimensional conformity • Workmanship • Edge detail • Surface finish • Stone condition • Packing integrity
Final release follows completion of the agreed quality checks and preparation for protected transport.

Built around the project brief.

For hospitality, residential and development schemes, ExecHomes&Co can supply standard collection pieces or develop bespoke natural-stone products directly from drawings, schedules and design intent.

BATHROOM + WELLNESS

Freestanding natural-stone baths
Wall-mounted, countertop and pedestal basins
Vanity tops and double-basin configurations
Shower trays and project-specific bathroom stonework

FURNITURE + PUBLIC AREAS

Dining, coffee and side tables
Reception counters and statement stone pieces
Project-specific furniture and architectural features
Coordinated quantities for guestrooms, suites and shared spaces

SELECTED STANDARD FORMATS

Beaumont / Cotswold baths

1750 x 700 x 600 mm

Kanso soaking bath

Ø1200 x 700 mm

Manor House bath

1500 x 1500 x 650 mm

Piccolo basin

300 x 250 x 200 mm

Verona basin

600 x 400 x 200 mm

Valenza basin

1200 x 400 x 200 mm

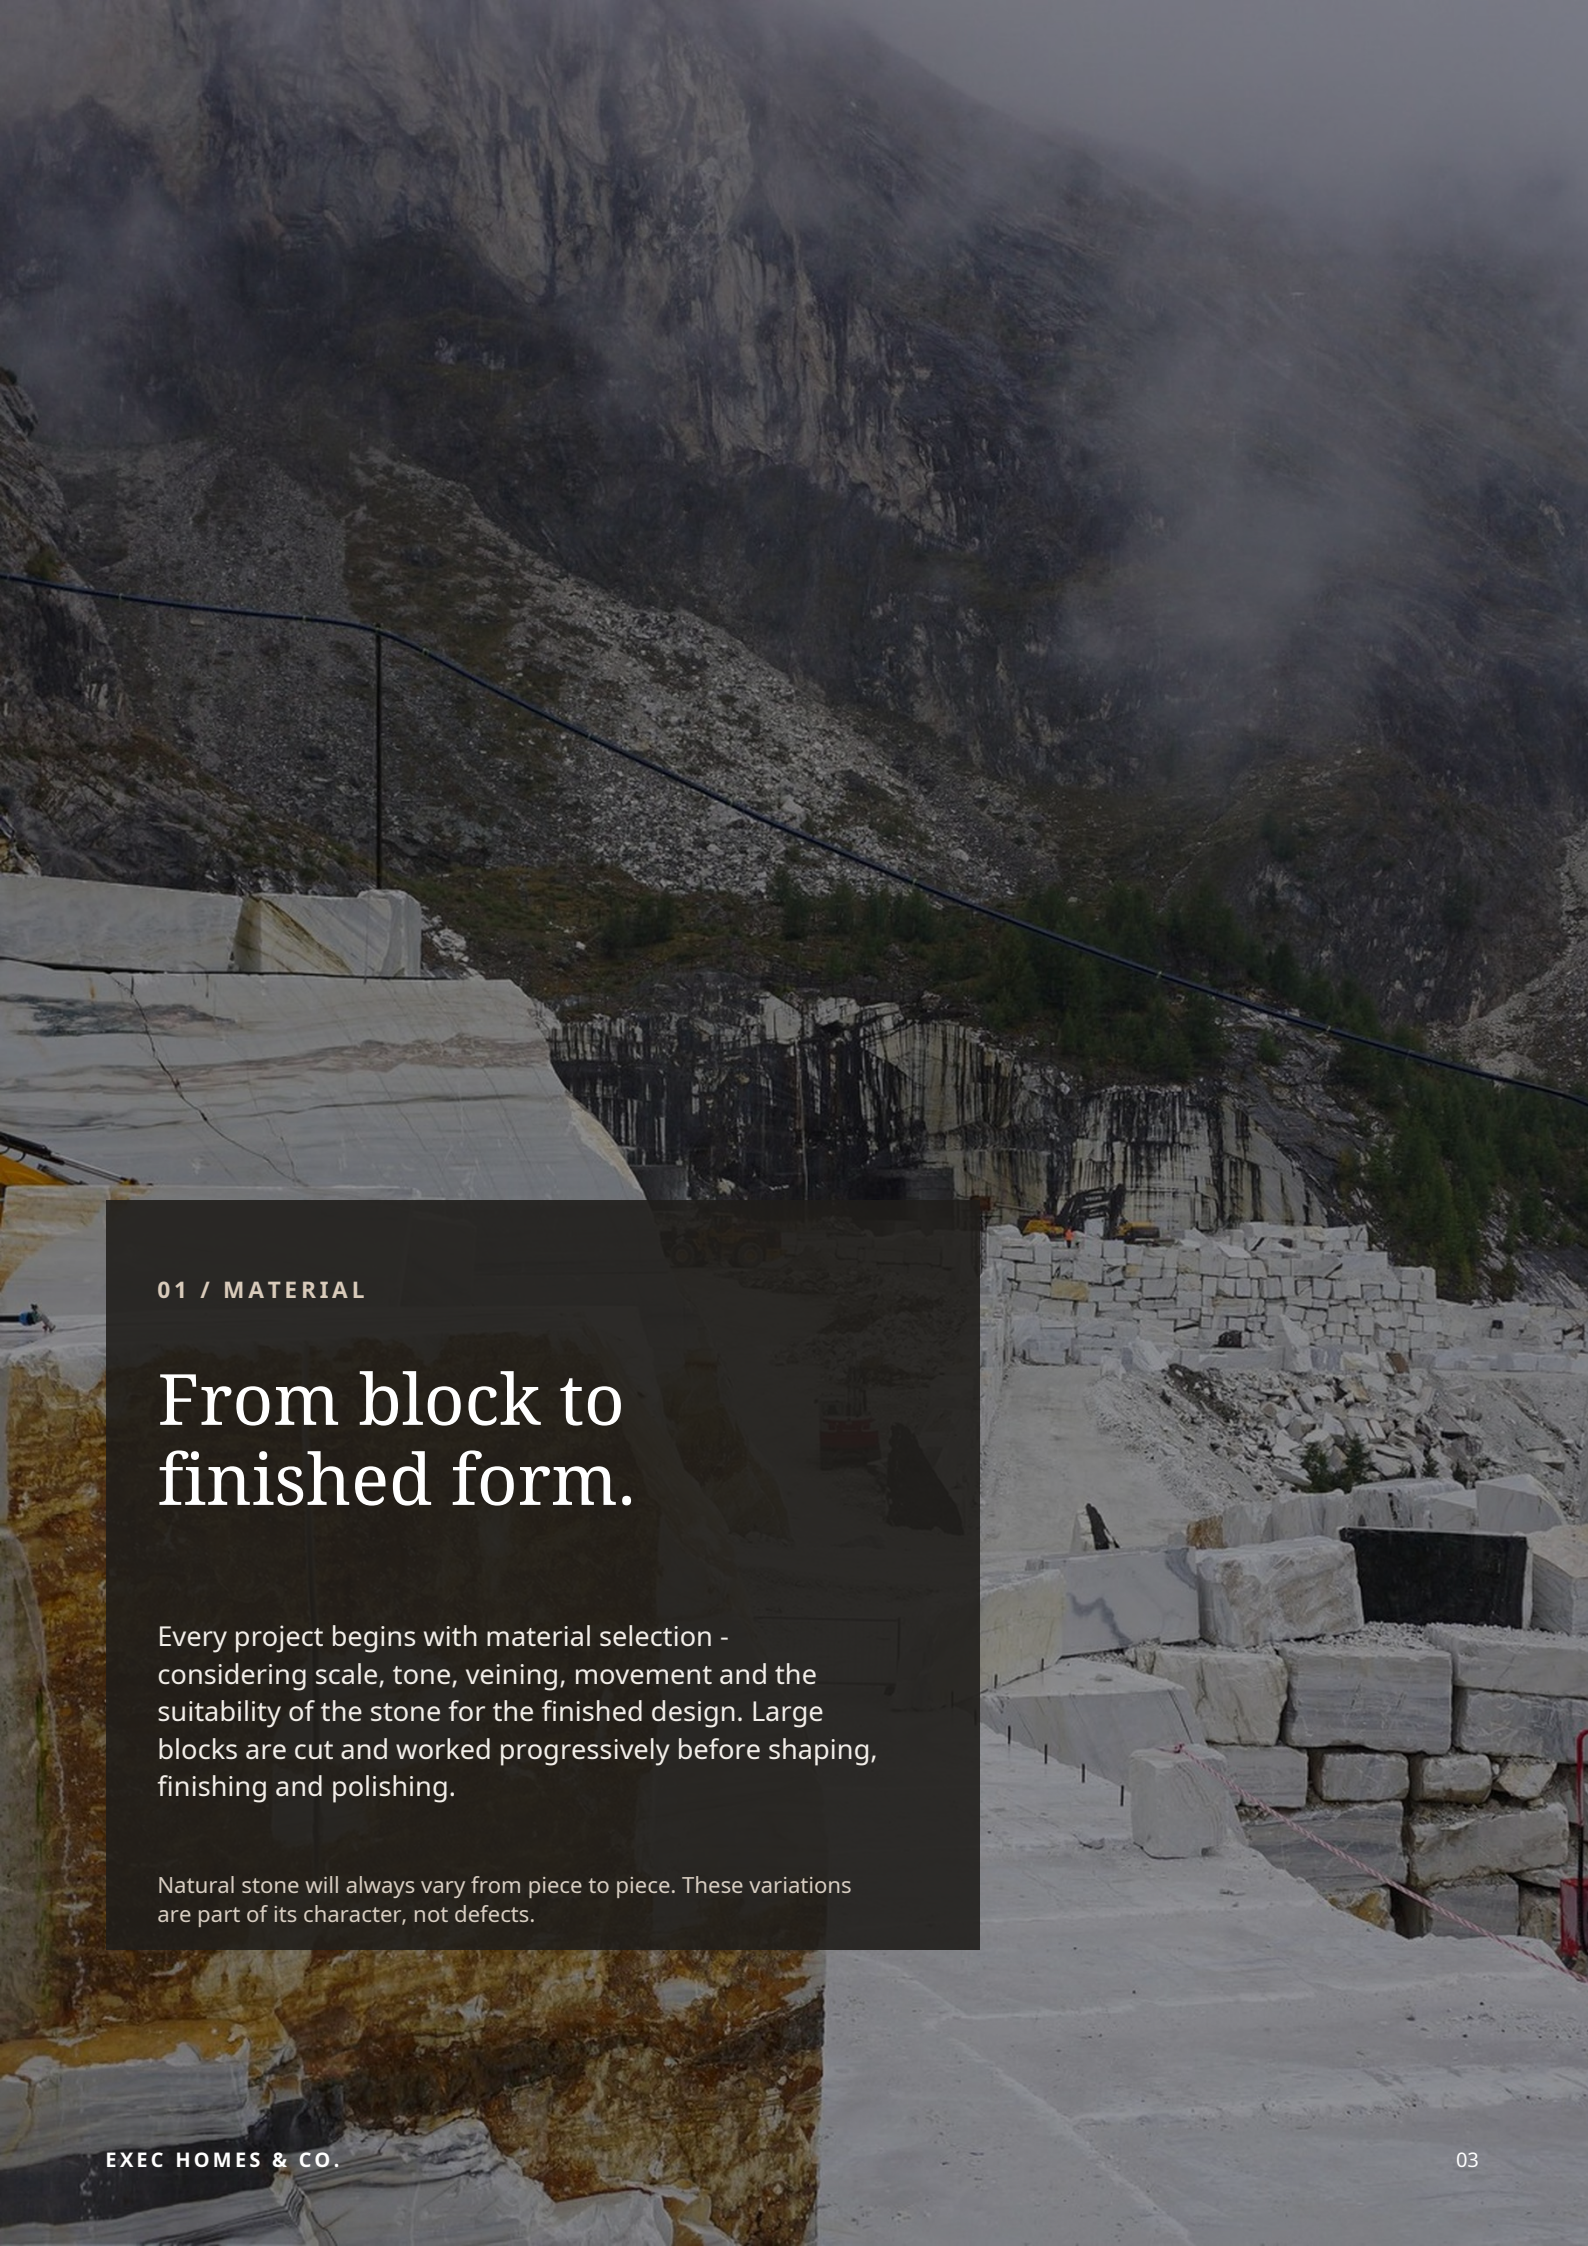

Grande Aurelia double basin

1500 x 400 x 300 mm

Bespoke project pieces

Developed to agreed specification

Dimensions shown are selected standard examples. Bespoke sizing and design adjustments are subject to material suitability and technical review.

01 / MATERIAL

From block to finished form.

Every project begins with material selection - considering scale, tone, veining, movement and the suitability of the stone for the finished design. Large blocks are cut and worked progressively before shaping, finishing and polishing.

Natural stone will always vary from piece to piece. These variations are part of its character, not defects.

CRAFTSMANSHIP

Cut. Carved. Finished.

Solid natural stone demands a different approach to ordinary furniture and sanitaryware. Each form is shaped through a sequence of cutting, hollowing, profiling and hand-finishing stages.

THE PROCESS

- 01 Stone selection** Veining, tone and block scale are considered against the intended design.
- 02 Shaping** The piece is cut and formed to establish the primary geometry.
- 03 Detailing** Edges, fluting, bowl forms and recesses are refined.
- 04 Finishing** Surfaces are polished and checked before final preparation.

BATHROOM COLLECTION

BASINS

Architectural stone, made functional.

Designed as focal points rather than accessories, our natural-stone basins are available in wall-mounted, countertop and pedestal configurations, with single and double-basin options across selected designs.

Custom dimensions can be specified for suitable projects. Tapware and installation details should be coordinated with the project team before fabrication.

BATHS

Sculptural bathing.

Freestanding bathtubs carved from solid stone create a strong architectural centrepiece. The material provides visual weight, tactile depth and natural variation that cannot be replicated in a manufactured surface.

SPECIFICATION NOTES

Solid-stone baths are exceptionally heavy. Floor structure, access routes, lifting requirements, drainage and tap positions must be assessed before delivery and installation. Natural veining and tonal movement will vary from piece to piece.

FLUTED STONE

Texture becomes part of the form.

Fluting adds rhythm and shadow to the exterior surface, turning a monolithic block into a more detailed architectural object while retaining the mass and presence of natural stone.

Standard sizes are available across selected bath collections, with custom sizing available by enquiry.

COUNTERTOP BASINS

NATURAL STONE BASINS

Small scale. Strong character.

Countertop basins allow the stone itself to become the visual focus. Rounded, organic and geometric forms can be produced across a wide range of marble, onyx and quartzite selections, subject to material suitability.

PROJECT OPTIONS

- Countertop & pedestal formats
- Wall-mounted designs
- Single & double basin layouts
- Custom dimensions by enquiry
- Choice of natural stone

DINING TABLES

DINING

Monolithic proportions, refined finish.

Dining tables are designed around the natural movement of the slab and the scale of the room. From restrained rectangular forms to circular statement tables, each design balances solid-stone presence with precise proportions.

Available in selected standard sizes with bespoke dimensions available for suitable projects.

Coffee & Side tables.

Compact architectural forms give natural stone a strong presence in living spaces. Choose the geometry first, then define the character through the stone.

PROJECT FLEXIBILITY

Rectangular and circular coffee tables can be specified across selected stone types, with bespoke dimensions and finishes developed for suitable residential and hospitality projects.

FORM + MATERIAL

Stone choice changes the character of the same form - from restrained monochrome marbles to expressive breccias and coloured stone. For project work, dimensions, stone selection and finish can be coordinated around the wider interior scheme and reviewed for material suitability before production.

DESIGN & SPECIFICATION

PROJECT SUPPORT

From concept to specification.

For residential, hospitality and development projects, our sales team can help coordinate product selection, stone choice and dimensional requirements before production.

IN-HOUSE DESIGN MANAGER

Our in-house Design Manager can work closely with architects and interior-design teams on bespoke requirements. Drawings, dimensions, finishes and stone selections can be reviewed and developed into production-ready specifications before manufacture.

Typical lead time: 6-8 weeks, subject to stone availability and final specification.

PROJECT ENQUIRIES CAN INCLUDE

- Stone and colour selection
- Custom sizing
- Product quantities
- Residential development schedules
- Hospitality and commercial specifications
- Access / installation planning for heavy stone pieces

Seventeen distinctive stones.

A curated palette across marble, onyx, quartzite and travertine. Stone is selected with consideration for scale, tone, veining, movement and suitability for the intended product.

MARBLE

Amazon Green

Arabescato Corchia

Bolivian Blue

Bulgari Red

Calacatta Blue

Crema Marfil

Dark Emperador

Nero Marquita

Panda White

Rosa Alicante

Rose Cream

Rosso Levanto

Shangri La Green

ONYX

Bamboo Emerald Onyx

Pink Onyx

QUARTZITE

Taj Mahal Quartzite

TRAVERTINE

Beige Travertine

NATURAL VARIATION

Every block and slab is naturally individual. Veining, shade, mineral markings and tonal movement will vary from samples and imagery. For project quantities, material selection and visual consistency are reviewed against the brief before production.

Project support beyond the product.

Our team works with developers, architects, interior designers, hospitality groups and private clients who require more than an off-the-shelf product. We coordinate specification, project quantities, bespoke dimensions and delivery planning around the requirements of the scheme.

PROJECT ENQUIRIES

- Stone and colour selection
- Custom sizing and configurations
- Product quantities and coordinated schedules
- Hospitality and commercial specifications
- Access, lifting and installation planning
- Worldwide delivery coordination

PROJECT DOCUMENTATION

- Dimensions and specification review
- Production drawings where required
- Pre-production confirmation of key details

TYPICAL LEAD TIME

6-8 weeks

Subject to stone availability, final specification and project quantity.

Natural stone is inherently variable. Product imagery is representative; veining, shade and mineral pattern will differ between individual pieces. Technical feasibility, access and installation requirements should be confirmed for each project before production.

BESPOKE SIZING	IN-HOUSE DESIGN	PROJECT QUANTITIES	WORLDWIDE DELIVERY
Made around project dimensions.	Support for custom forms and details.	Single pieces through coordinated schemes.	Project-focused delivery coordination.
